Thanks Nicole – I definitely didn't think we'd be able to weigh in on this, but wanted your input before telling Jean that, so thanks for confirming that for me. I'll make the CalOSHA suggestion to Jean.

Hi Steven-

Since this isn't a site that EPA has any current involvement with and we haven't done a review of the information, this would be a pretty tough call. The only thing I can think of is that Jean could contact Cal OSHA since she is worried about worker safety.

Hey Jean – I'll forward this to Nicole ... she'll have a better grasp on whether this is something EPA could weigh in on at this point in time.

Steven

I forgot to ask one question....is there anyway EPA can stop the City of Riverside and the developer from temporarily conducting activities on the Ag Park Site for now, until investigation is complete...we are concerned that city workers will be exposed to contaminates...the workers are concerned but they don't want to say anything..for fear of losing their jobs. I know this is a tough one...

Thanks,
Jean
